Imed Eddine Abderrahmane SLIMANI

imeds2000@gmail.com | slimanimeddine.codes | github.com/slimanimeddine

Skills

Frameworks: Next.js, Laravel
Libraries: React.js, TanStack React Query, React Hook Form, nuqs, TailwindCSS, Orval, Zustand, Zod, Knuckleswtf/scribe, Spatie Laravel Query Builder, Laravel Scout, Laravel Reverb, Laravel Echo
Languages: PHP, JavaScript, TypeScript
DevOps: Git, Laravel Forge, Digital Ocean, Github Actions

Experience

Freelance Full Stack Developer, Skewes Agency – Sidi Bel Abbès   April 2024 – May 2025

- Built and deployed backends and admin panels for two production mobile apps — AJRLI (construction equipment rental platform in Algeria) and Majan Road (tourism app in Oman) — both published on the Play Store and App Store.
- Developed RESTful APIs in Laravel to handle CRUD operations and automated rental workflows through scheduled tasks.
- Implemented secure authentication using Laravel Sanctum, integrated with NextAuth and cookies, ensuring reliable end-to-end session management.
- Enhanced user experience and performance by leveraging TanStack Query for efficient data fetching and TanStack Table to seamlessly handle thousands of rows.
- Optimized deployment by using Laravel Forge on DigitalOcean, reducing setup and configuration time significantly.

Projects

Arthive   slimanimeddine.codes/projects/arthive

- Built a feature-rich platform with backend (Laravel API), frontend (Next.js), and admin panel.
- Designed and documented a RESTful API, improving backend developer experience.
- Leveraged OpenAPI + Orval to auto-generate type-safe TanStack Query hooks and Axios clients.
- Improved performance with Next.js SSR and prefetching for faster page loads.
- Integrated Laravel Scout with TypeSense full-text search for artworks and artists.
- Implemented real-time notifications using Laravel Reverb.
- Built a comprehensive auth system (signup, login, email verification, password reset).
- Deployed services on DigitalOcean, configured custom domains, and secured with Let's Encrypt SSL.
- Set up CI/CD pipelines (GitHub Actions) for automated builds and deployments.

Taskflow   slimanimeddine.codes/projects/taskflow

- Created a project management tool that assists teams in organizing tasks and collaborating effectively.
- Implemented an invite system to easily onboard new members into a workspace.
- Designed different task views (table, kanban, calendar) using @hello-pangea/dnd and react-big-calendar to facilitate tasks visualization.
- Designed and documented a backend that adheres to RESTful conventions for better backend DX.
- Leveraged OpenAPI schema and Orval to generate TanStack Query and Axios API calls which cut out hours in development and ensured end-to-end type safety.

Education

Djilali Liabes University – Master's Degree in Networks, Systems and Information Security   June 2024
Djilali Liabes University – Bachelor's Degree in Information Systems and Software Engineering   May 2022
